- Carrot & Potato 39

As a leading supplier of packaging to the fresh produce industry, TC holds stock of industry specific products and general purpose items. From Apples to Potatoes, we have liners and bags suitable for both harvest and post-harvest packaging.

All products are food approved and manufactured to European and US FDA standards.

As a specialist manufacturer, TC can supply custom bags and liners or roll stock films for form-fill-seal packing.

TC can create modified atmospheric (MAP) films to cater for humidity, CO2, ethylene absorption and other product requirements.

General Purpose

Food approved, fully recyclable liners, designed to package and transport products in the horticulture industry.

• Please contact us for customisation and print opportunities. Minimum order quantities will apply.

In collaboration with national, leading research institutions, Transcontinental modelled a tool to calculate the optimum expiration rate of different fruit and vegetables.

Utilising this information, Transcontinental combined a unique hole punch and In-line seal conversion technique to develop a Freshview bag.

Freshview is a fully recyclable bag which permits an appropriate air transfer rate while still restricting light (UV). The Freshview punch window is clear to allow the consumer to view the internal contents of the bag prior to purchase.

RETAIL & FOOD SERVICE

SECTION

3

- Produce bags 43
- Seafood 44
- Butchery 45
- Bakery 46
- Chilled Goods 47
- Singlet & Carry bags 49
